When **acoustics** become **decoration.**

In the exciting world of interior design, acoustics is an aspect that is often overlooked, but is nonetheless essential. Imagine a space that is not only visually captivating, but also envelops your senses in a cocoon of tranquillity and well-being. This is where acoustic decoration comes into its own.

Step into this captivating world with **Tecsound®**, your partner in enhancing your living spaces. Explore a diverse range in which creativity merges with technical expertise. Products range from customised acoustic panels to made-to-measure prints, innovative acoustic globes, green acoustic panels, islands and baffles in different materials. Each product embodies a perfect blend of functionality and elegance, creating a harmonious balance between practicality and sophistication for all your spaces.

Tecsound® is noted for creating a perfect fusion between the cutting-edge expertise of an acoustic specialist and the ingenuity of a manufacturer of made-to-measure solutions. As heir to the **SOPREMA** group, a family-owned company founded in 1908, **Tecsound®** has been perfecting its technical and design skills for more than 20 years in preparation for the acoustic challenges of the spaces of the future.

Tecsound® invites you to rediscover well-being within your own home. Its sound-absorption solutions create a calm environment where noise fades into the background, creating space for serenity and relaxation. At **Tecsound®**, enhancing life's beauty is about more than simple aesthetics; it is also about cultivating harmony day to day.

Be inspired by the lifestyle encapsulated by **Tecsound®**, where every detail is designed to awaken your senses and enhance your home. With **Tecsound®**, beauty and well-being combine to create enchanting, inspiring spaces where life takes on its full meaning.

_DESIGN OFFICE

A team of passionate experts who will **consider** all your needs **down to the last detail**.

Our specialists are committed to complying scrupulously with the standards in force and will go above and beyond to fulfil your needs in terms of comfort, guaranteeing optimum compliance that will exceed all your expectations.

We are committed to supporting you every step of the way thanks to:

_Cutting-edge expertise

Our team is made up of qualified professionals who are specialists in their field.

_Compliance with standards

We guarantee strict compliance with the regulatory standards in force as well as our own rigorous technical standards.

_Innovations

We offer you innovative, effective solutions in order to face the complex challenges linked to current acoustic constraints.

_Quality, reliability and precision

The quality of our studies and calculations is impeccable, and an essential factor in the success of your projects.

_Optimisation of costs

We identify inefficiencies and propose practical solutions to maximise your investments.

_Customisation and adaptation

We offer you made-to-measure solutions as a perfect response to your specific needs.

Our experts will support you every step of the way in your project, using their skills to help you to fulfil your goals.

_Case study

Our involvement from the very start of the project with the **Galopin restaurant in Paris**, was helpful for the owner both in terms of cost and for the harmonious integration of our solutions in the existing décor. The need for acoustic comfort in certain specific areas of the restaurant was quickly identified as a way of enhancing customers' well-being.

We carried out a preliminary acoustic study in close cooperation with the architects, which enabled us to integrate made-to-measure acoustic solutions and tailor them to the restaurant's specific needs, while maintaining the desired atmosphere for the space.

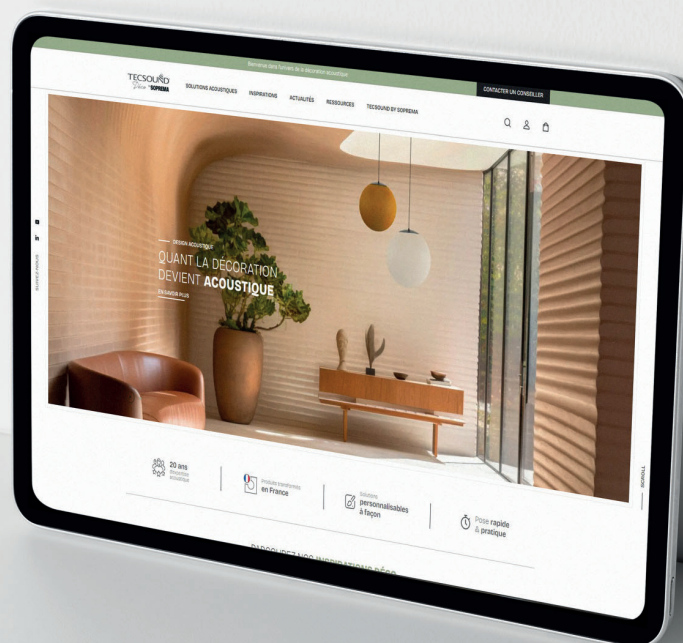

→ **SopraKustik STUDIO**, shapes and colours available to order.

Thanks to our on-line acoustic calculator on the site **www.tecsound.fr**, we are able to configure made-to-measure solutions adapted

_E-SHOP TECSOUND DÉCO

Transform your spaces

_ A dedicated customer service

You can easily contact our design office via the 'Contact' section for support with your acoustic projects. The entire Tecsound team is at your disposal to answer any questions you may have, offering advice and support throughout the order process, from design to delivery.

_DESCRIPTION

BAB (Beautiful Acoustic Ball) is much more than a simple acoustic ball: it is the global benchmark for Cofrac-certified spherical acoustic solutions that redefines both the aesthetics and the functionality of your interiors.

The ball is hand-woven and filled with melamine foam and provides remarkable sound attenuation by trapping sound, thus enhancing the comfort and clarity of conversations in the space.

The balls are available in a range of sizes and colours, allowing for complete customisation, and their easy installation makes them an effective, flexible solution for optimising sound comfort without compromising decorative appeal.

→ Installation areas

Hotel foyers, restaurants, cafés, bars, offices, conference rooms, waiting rooms, public-access buildings.

DECOKUSTIK

_WHAT YOU SAY

François Fournier

General Manager of Mercure hotel

How would you describe your space before you used our acoustic decoration products?

The space used to be aesthetically cold as the room was completely white. The breakfast room can accommodate up to 45 people and when it was full it was unpleasant because of the commotion caused by all the noise (customers chatting, coffee machine vibrating, kettle boiling, etc.). The ceiling in the room is vaulted and supported by pillars. Because of this unusual shape, acoustic islands were awkward to use. The ceiling was also too low to use acoustic baffles.

How did you first get in touch with Tecsound?

We made an appointment with Tecsound at the HR Meeting in 2023 to discuss sound reverberation problems in the dining room. Since then, BAB have been installed to alleviate this problem. Everything went really smoothly. Customer relations were good, the price was fair, the ceiling installation was simple and the result was amazing.

Did you have any specific criteria in mind when choosing our products?

Before we came across Tecsound, we had only contacted one company who had offered an unsuitable solution for the problem described. The company suggested using various acoustic totems that would be placed on the ground. As the dining room is sometimes rearranged, having to move these totems around seemed too restrictive. Particularly as customers could have knocked them over. And the price was too high. Our decision was therefore made above all on the basis of practicality and price.

How was it when our acoustic panels were installed?

The **BAB** were very quick and easy to install and set up.

Can you describe how the sound quality of your space has changed?

The difference is incredible. Customers can now enjoy a calm environment without all the commotion. The breakfast area is now a peaceful space where people can start their day calmly. Repeat customers have highlighted the positive transformation in the décor brought about by the 25 different-coloured acoustic globes in various sizes.

Have you noticed an improvement in your well-being since the installation?

We now have a warm and peaceful breakfast room. New customers haven't commented, but we know this something they must value subconsciously.
